IS THIS COMPLETE?

TIMELINES?

time lines are widely used and vital enough for medical records, project management, or historical presentations to create a data type that is separate from 1-dimensional data.

DATA ATTRIBUTES

attribute types

→ Categorical
no implicit ordering

attribute types

→ Categorical
no implicit ordering

→ Ordered

→ *Ordinal*

attribute types

→ Categorical
no implicit ordering

→ Ordered

→ Ordinal

→ Quantitative

meaningful magnitude,
can do arithmetic

BASIC DATA ATTRIBUTES (FORMAL)

- Nominal (N) {...}
- Ordinal (O) <...>
- Scale / Quantitative (Q) [...]

- Q → O
 - [0, 100] → <F, D, C, B, A>
- O → N
 - <F, D, C, B, A> → {C, B, F, D, A}
- N → O (??)
 - {John, Mike, Bob} → <Bob, John, Mike>
 - {red, green, blue} → <blue, green, red>??
- O → Q (??)
 - Hashing?
 - Bob + John = ??

OPERATIONS ON BASIC DATA ATTRIBUTES

- What are the operations that we can perform on these data types?
 - Nominal (N)
 - = and \neq
 - Ordinal (O)
 - $>$, $<$, \geq , \leq
 - Scale / Quantitative (Q)
 - everything else (+, -, *, /, etc.)

QUESTIONS?

Visual Attributes

MARKS

- graphical element in an image
- classified according to number of spatial dimensions required

points (0D)

lines (1D)

areas (2D)

CHANNELS

-parameters that control the appearance of marks

IN CLASS EXERCISE...

IN CLASS EXERCISE

- 5 groups
- Each group is assigned a visual channel:
 - shape, color, length, area, position
- Represent the following dataset using **only** your visual channel

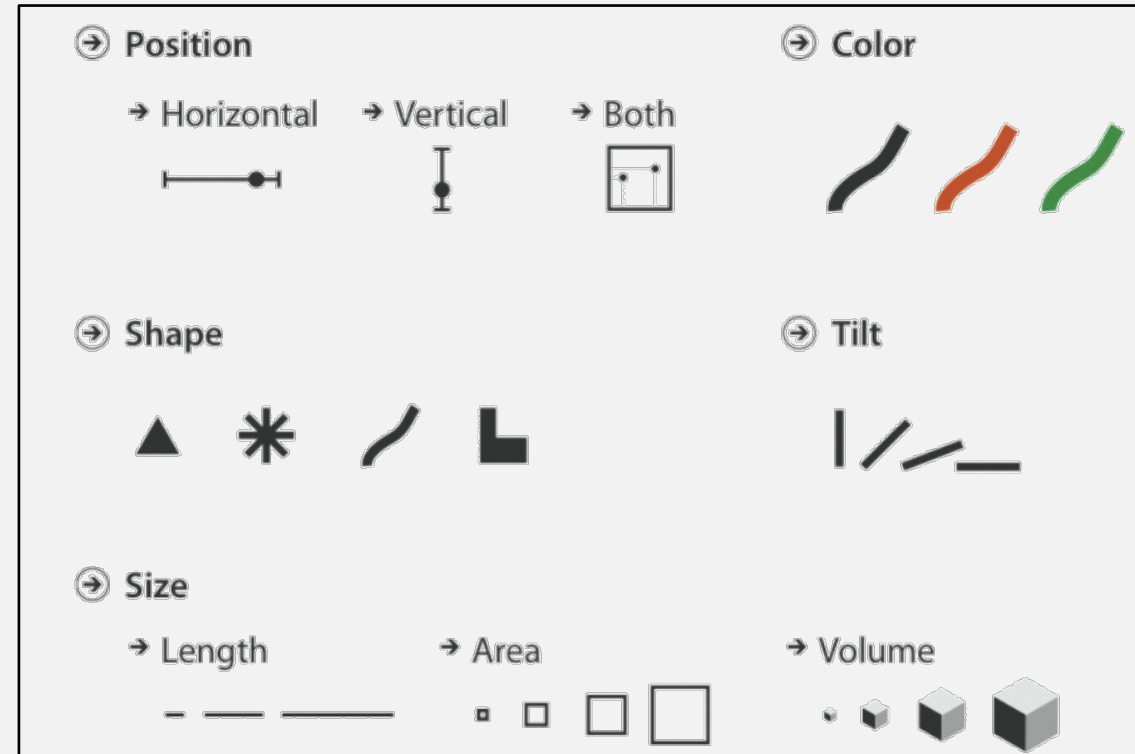

Animal	Times bitten
Cat	2
Dog	12
Bird	6

Animal	Color
Cat	brown
Dog	brown
Bird	blue

Animal	Level training
Cat	high
Dog	poor
Bird	fair
