

98-0885R1

**Proposal To Move The
DFBA Text To Baseline**

Rohit Goyal, Raj Jain, Sonia Fahmy, Bobby Vandalore,
Mukul Goyal

**Raj Jain is now at
Washington University in Saint Louis
Jain@cse.wustl.edu
<http://www.cse.wustl.edu/~jain/>**

- ❑ The DFBA Scheme: 98-0405
- ❑ Motion

GFR Sample Implementations

- ❑ VII.2.1: WFQ and Per-VC Accounting
 - Works for TCP [ATM Forum 97-0528]
 - Multiple TCPs per VC not tested
- ❑ VII.2.2: Tagging and FIFO Queuing
 - Does not work for TCP [ATM Forum 97-0310]
- ❑ (Proposed VII.2.3): DFBA [ATM Forum 98-0405]
 - Works for TCP
 - Works for multiple TCPs per VC
 - Works for terrestrial and satellite RTTs

Differential Fair Buffer Allocation

$$X > H$$

\Rightarrow EPD

$$X > L \Rightarrow \text{Drop all CLP1.}$$

$$X > L \text{ and } X_i > X * W_i / W \Rightarrow$$

Probabilistic Loss of CLP0

$$X \leq L$$

\Rightarrow No Loss

- $W_i = \text{Weight of VC}_i = \text{MCR}_i / (\text{GFR Capacity})$
- $W = \sum W_i$
- $L = \text{Low Threshold. } H = \text{High Threshold}$
- $X_i = \text{Per-VC buffer occupancy. } (X = \sum X_i)$
- $Z_i = \text{Parameter } (0 \leq Z \leq 1)$

DFBA Operating Region

Buffer occupancy (X)

 Desired operating region

DFBA (contd.)

TCP Rate $D \propto \frac{MSS}{RTT \times \sqrt{P(drop)}}$

New Baseline Text

- ❑ **VII.2.1 GFR Implementation using Weighted Fair Queuing and per-VC accounting**

(Unchanged)

- ❑ **VII.2.2 GFR Implementation Using Tagging and FIFO Queue**

(Unchanged)

- ❑ **VII.2.3 GFR Implementation Using Differential Fair Buffer Allocation**

(From living list)

- ❑ **VII.2.4 Evaluation Criteria**

(From VII.2.3 in the baseline text document.)

DFBA Algorithm

When first cell of frame arrives:

IF ($X < L$) THEN

Accept frame

ELSE IF ($X > H$) THEN

Drop frame

ELSE IF (($L < X < H$) AND ($X_i \leq X \times W_i / W$))

Drop CLP1 frame

ELSE IF (($L < X < H$) AND ($X_i > X \times W_i / W$))

Drop CLP1 frame

Drop CLP0 frame with

$$P\{\text{Drop}\} = Z_i \left(\alpha \times \frac{X_i - X \times W_i / W}{X(1 - W_i / W)} + (1 - \alpha) \times \frac{X - L}{H - L} \right)$$

Motion

- Move the modified Section VII.2.3 in the GFR section of the living list to the baseline text.
