## Grading

Quizzes (Best 2 of 3) 50%

□ Class participation 10%

☐ Homeworks + Labs 40%

## **Answers to Frequently Asked Questions**

- ☐ Yes, I do use "curve". Your grade depends upon the performance of the rest of the class.
- □ All homeworks are due at the <u>beginning</u> of the next class.
- □ All late submissions must be <u>preapproved</u>.
- □ All quizzes are open-book and <u>extremely</u> time limited.
- Quizzes consist of numerical as well as multiple-choice (true-false) questions.
- □ There is <u>negative</u> grading on incorrect multiple-choice questions.
- Everyone including the graduating seniors are graded the same way.

## Quiz 0: Prerequisites

True or False?
T F
☐ ☐ Datalink refers to the 2nd layer in the ISO/OSI reference model
☐ ☐ Category 5 unshielded twisted pair cable is better than category 3 cable.
☐ ☐ Finding path from one node to another in a large network is a transport layer function
☐ ☐ It is impossible to send 3000 bits/second through a wire which has a bandwidth of 1000 Hz.
☐ ☐ Bit stuffing is used so that characters used for framing do not occur in the data part of the frame.
☐ ☐ For long delay paths, on-off flow control is better than window flow control.
☐ ☐ Ethernet uses a CSMA/CD access method.
□ □ 10Base2 runs at 2 Mbps.
☐ ☐ The packets sent in a connection-oriented network are called datagrams.
☐ ☐ Spanning tree algorithm is used to find a loop free path in a network.
